- *HTML / CSS*

Coding languages

- *C#*
- *Java*

Data notation

- *XML*
- *JSON*

Projects (2026)

Dungeon crawler (Dunge) **Ongoing**

A game I first made in 2025 in a block based language called scratch, halfway through 2026 I started remaking it in java processing.

Features

- 2 DSL's for animations and enemy AI
- Configurable json for world gen
- Self built binary format for fast loading for the cost of slower saving

Languages

Java

3D platformer (Cool platformer)

3D platformer game made in the console app, My school gave us a project that gave us full creative freedom.

Features

- Lan multiplayer
- Immersive portals
- 3D assets with animations
- Several custom file formats for storing 3D models and animations

Languages

C#

Website builder (Kolomkamers) **Ongoing**

A project I started to learn about databases, API's and creating editors

Features

- Self made database with argon2 for password hash
- Basic html editor for webpages
- Custom markup format for saving files more compactly

Languages

HTML, CSS, JavaScript, Python
